

# HOME PAGE

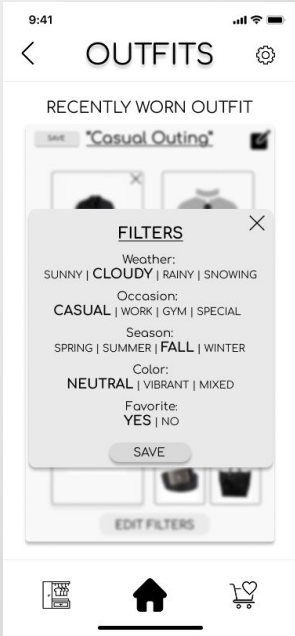

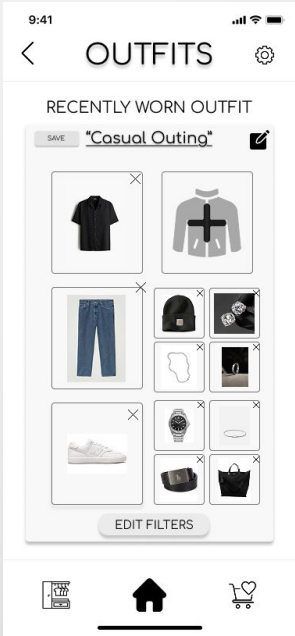

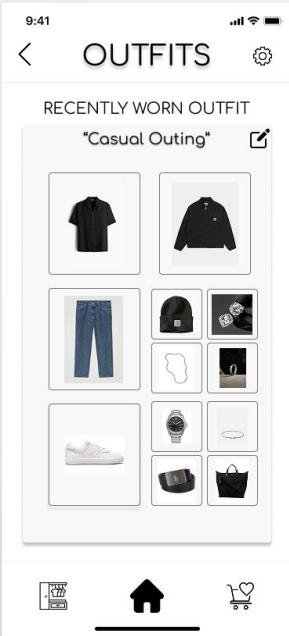

Tapping the '...' box expands the outfit view, dynamically resizing item slots based on the number and type of clothing and accessories. If an outfit has fewer accessories, the expanded view adapts by displaying only the required slots.

The 'Quick Access' feature, customizable in settings, suggests outfits based on the selected filter. When enabled, Quick Access takes users from the home page to the outfit page, filtering outfits based on the selected criteria. In this example, the weather filter is applied.

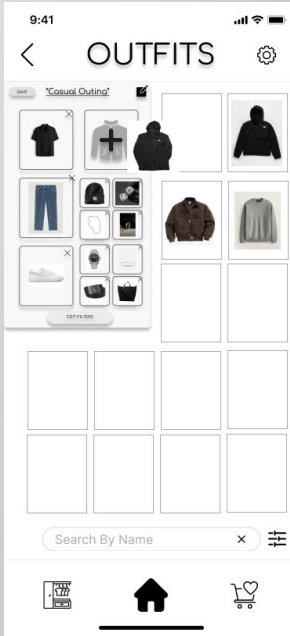

Both features navigate users from 'Wardrobes' to 'Outfits'.

Backing out will return you to 'WARDROBE,' where you can browse and select outfits.

## Example of a user swapping jackets in an outfit

Tapping "EDIT FILTERS"

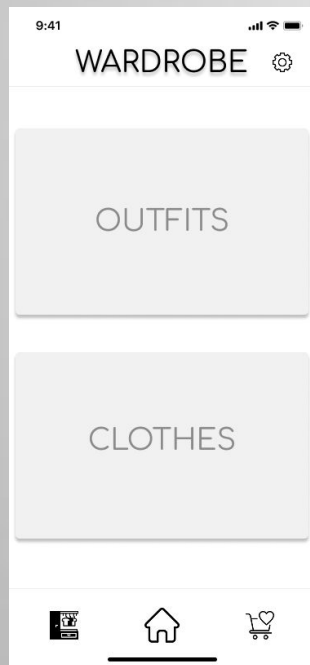

Tapping on the jacket with the '+' icon

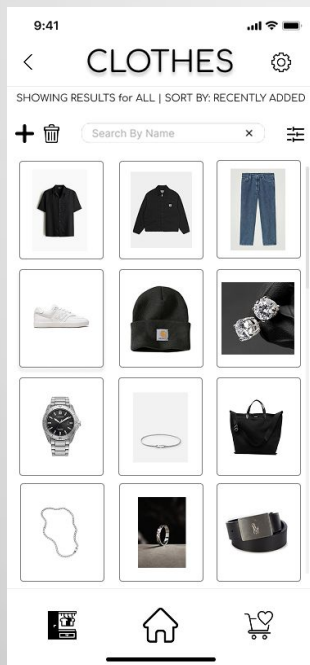

(Drag and drop feature)

When making changes in Edit Mode, backing out via the arrow (top left) or tapping on the 'x' prompts a confirmation message: 'Are you sure you want to exit without saving?' This ensures users don't accidentally lose their edits

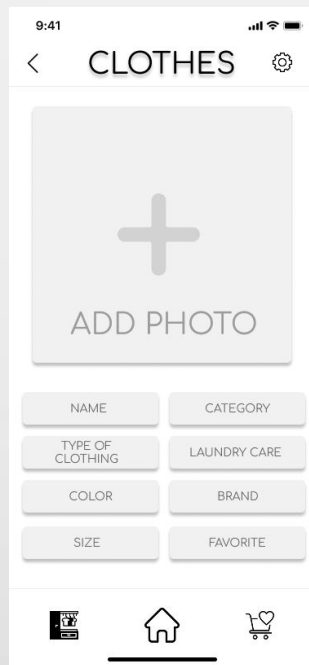

# WARDROBE PAGE → CLOTHES

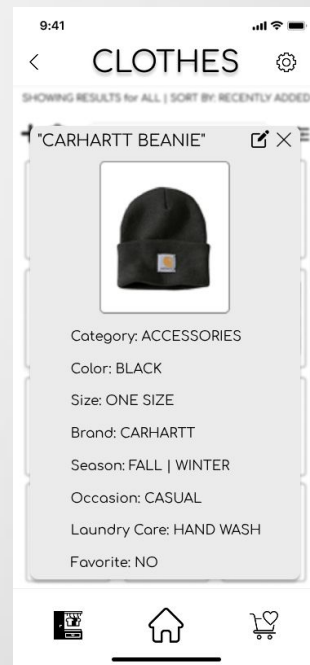

The **Clothes** section allows users to **view, edit, and organize** individual clothing pieces. This feature helps users efficiently manage their wardrobe by **sorting, filtering, and expanding items** to see more details.

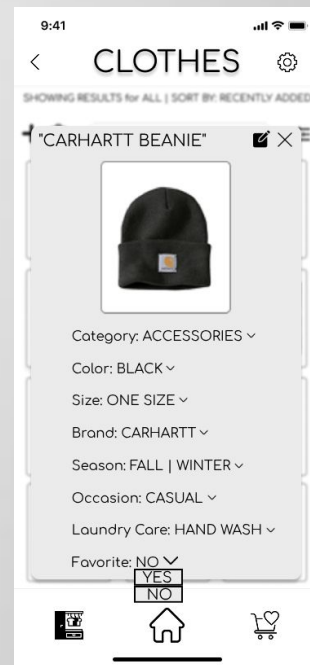

**Viewing Clothes:** Displays all individual clothing items, sorted by **recently added** by default. Users can search for items by **name** or use filters.

**Adding Clothes:** Users can upload a photo and categorize it by **name, type, color, brand, size, laundry care, and favorite status**.

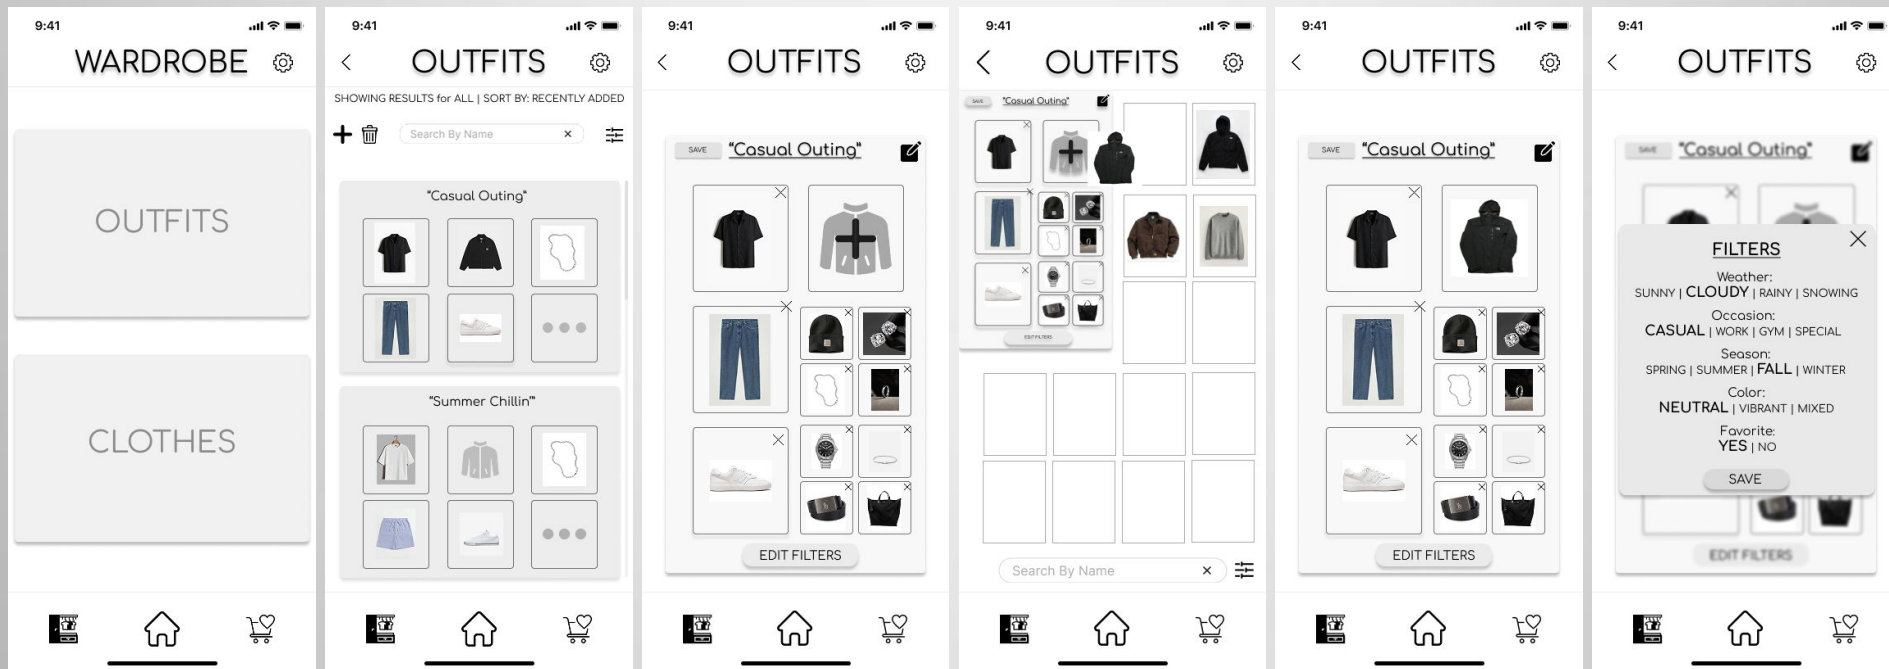

**Expanding Items:** Tapping a clothing item expands its view, showing details such as **category, size, brand, season, occasion, and care instructions**.

**Editing Items:** Tapping the **edit icon** allows users to modify item details, such as **category, size, brand, season, occasion, and care instructions**. Each field expands into a dropdown for easy selection. Once edits are made, users can **save changes** or **discard them** by tapping the respective buttons.

\* **Filtering Clothes:** Similar to outfits, filters allow users to sort by **category, brand, color, size, or favorites**.\*

# WARDROBE PAGE → OUTFITS

The **Outfits** section allows users to **view, edit, and organize** their saved outfits. This feature helps users efficiently manage their wardrobe by **sorting and filtering outfits** based on their preferences.

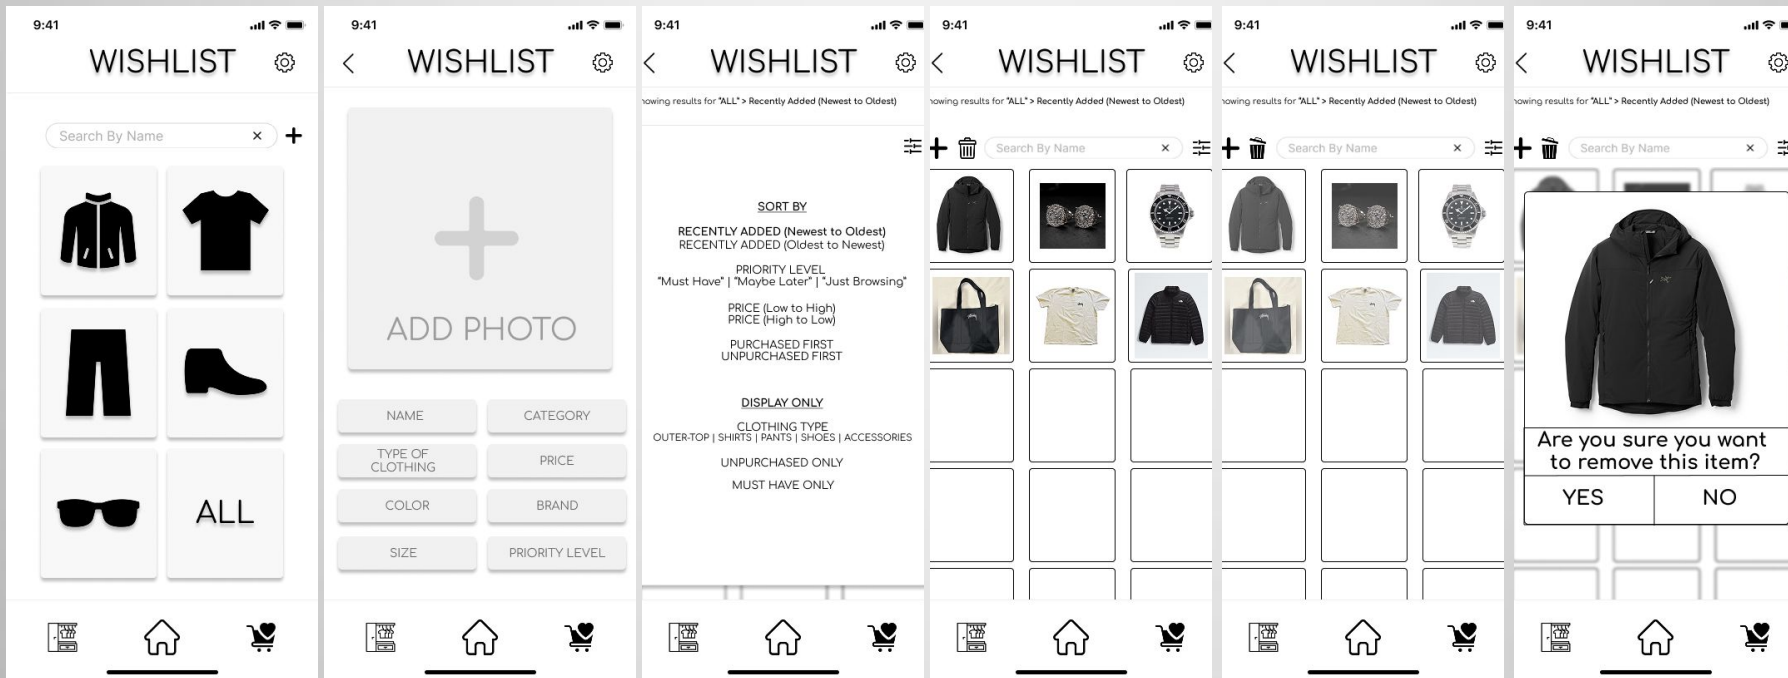

**Viewing Outfits:**  
Displays all saved outfits in a **grid format** for quick browsing.  
**\*Filtering follows similar format to wishlist\***

**Editing Outfits:**  
Tap on an outfit to enter **edit mode**, where users can **remove, swap, or add** clothing items.

**Adding New Outfits:**  
Similar to the **edit mode**, users can create a **new outfit** by selecting clothing items and saving them as a set.

**Filtering Outfits:**  
Users can apply filters to find outfits that match specific **weather conditions, occasions, seasons, color schemes, or favorites**.

# WISHLIST PAGE

## Main Wishlist Page:

Shows **category buttons** (Outerwear, Shirts, Pants, Shoes, Accessories, & "All"). **"+" icon** for adding new wishlist items

## Adding Items to Wishlist:

Users can add clothing items by tapping the **"+" icon** and uploading an image. Each item can be categorized by **name, clothing type, color, brand, size, price, and priority level** (Must Have, Maybe Later, Just Browsing).

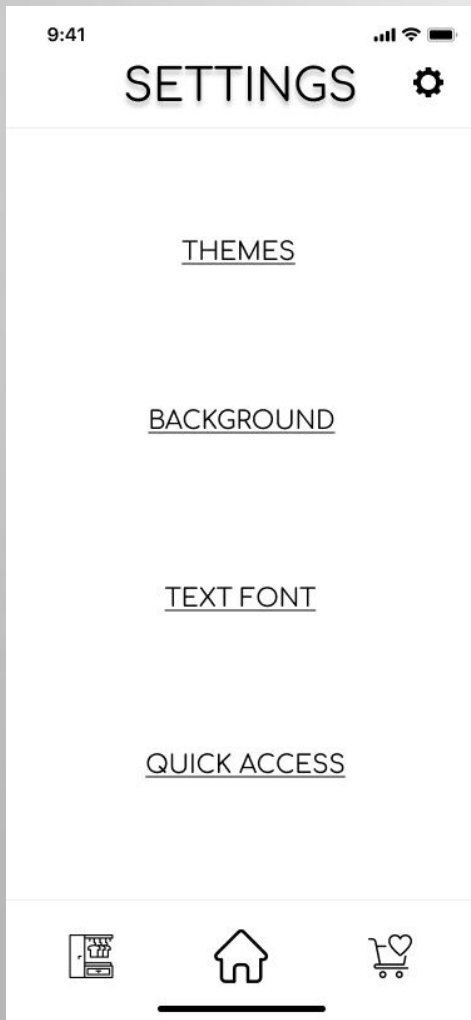

## Filter:

Filters allow users to display specific clothing types (**outerwear, shirts, pants, shoes, accessories**) or **show only unpurchased or must-have items**.

## Removing Items from Wishlist:

Tapping an item prompts a **confirmation message** before removing it to prevent accidental deletions.

**\*Editing Wishlist Items:** Follows a similar format to outfits/clothing\*

## SETTINGS PAGE

Settings allow users to customize their app experience and can be accessed from any tab. Options include:

- **Themes** → Change the app's appearance.
- **Text Font** → Adjust typography for readability.
- **Background** → Modify background color or patterns.
- **Quick Access Customization** → Set filters for recommended outfits (e.g., weather-based).

When selecting an option, such as **"Text Font,"** the chosen setting expands to the top while other options temporarily disappear, displaying only the available font selections.

Once changes are made, tap **"Save"** in the **top right corner** to confirm.

To discard changes, tap the **back arrow in the top left corner**, which will prompt a confirmation message:

*"Are you sure you want to discard changes?"*
